

**Trashing your old electronics just doesn't compute!  
Just like old clothes, old computers and electronics do have a place  
to go!**

Region III's **eCycling Pilot Project** (a joint effort between EPA and States) is sponsoring eCycling Collection Events for residents in the Mid-Atlantic Region over the next few months. These events will **not** accept electronic equipment from government agencies, organizations, and businesses.

If you've purchased or received new electronic equipment recently, and you would like to dispose of your old or outdated electronics (e.g., computers, monitors, printers, scanners, keyboards, mice, modems, laptops, TVs, typewriters, fax and answering machines, phones, VCRs, radios, stereos, and tape players), **consider recycling your equipment (at no charge)** by dropping it off at a collection event scheduled in your area. These electronics will be either refurbished or recycled! All equipment will be dismantled in the United States.

**Look for these upcoming eCycling events:**

March 22, 2003 in Lindenwold, New Jersey

April 12, 2003 in Bethesda, Maryland

May 10, 2003 in Doylestown, Pennsylvania.

For more information about these collection events, please call the EPA mid-Atlantic Customer Service Hotline at 800-438-2474 or visit the eCycling web page at: <http://www.epa.gov/reg3wcmd/eCycling.htm>

**eCycling** your electronics keeps dangerous materials out of landfills.  
Computers and accessories, televisions and other electronic equipment contain materials such as lead, mercury, cadmium, and chromium.  
These materials need to be handled properly and not released into the environment.
